## GENETIC ANALYSES FROM HOME WITH ONLINE MEDICAL SUPPORT

Nowadays, **more than half the population (56%)** carries genetic mutations susceptible of developing the predominant hereditary diseases in Spain, says the "Unidad de Medicina Genómica del centro Salud de la Mujer Dexeus."<sup>1</sup> Regarding the situation, medmesafe offers **genetic analyses and counselling services**, because taking into consideration the role our genes play, we can take **preventive action to protect our health and wellbeing**.

### WHAT DO WE OFFER?

#### 1. Our genetic analyses services:

If you have a **personal or familiar history of disease**, you may directly register on our platform to purchase a specific genetic test.

Choose your analysis and a healthcare professional will contact you in 48 hours

You will receive a sample collector kit at home that will be picked up by a courier

One of our partner labs will proceed to make the analysis

Your healthcare professional will present your results by videoconference

medmesafe offers up to **16 genetic services** so far (screening and video-counselling) in the fields of Oncology, Cardiology, Neurology, Rheumatology and Nutrition and Food Intolerances...

## 2. Our genetic counselling services:

If you need any advice about genetic analyses to take, medmesafe offers a [genetic counselling service](#) via **videoconsultation**, to obtain the opinion of an expert in genetics. It permits to trace your **family history** and expose all your **doubts** about genetics with an expert. If indicated, the specialist may prescribe a genetic analysis at the end of the consultation.

1  
After payment reception, choose the healthcare professional that will give you the counselling

2  
Schedule an appointment from the available options

3  
At the date and time chosen, you will connect to the videoconsultation from your Personal Area
