

**ENZYMES IN SILICO SCREENING IN METATRANSCRIPTOMIC AND METAGENOMICS EXPERIMENTS**

**Summary**

- Specially designed for NGS Technology data
- Customized screening to meet the client's objectives
- Thanks to the use of the "cloud computing", high efficiency and speed is achieved when comparing the metagenomic and metatranscriptomic data to large protein databases

**Applications**

*- Search for new useful enzymes for the production processes of bioethanol or biodiesel based on metagenomics or metatranscriptomics samples*

**Patent application number**

**Priority date**
