

**GRUPO DE BIOCOMBUSTIBLES**

**BIOTECHNOLOGY TO PRODUCE BIOFUELS**

**Summary**

The research groups of the Instituto Andaluz de Biología y Bioprocesos de Alimentos (IAB) have expertise in microbial, algae and plant (perennial and annual crops) molecular biotechnology: the aim is to improve their application in biofuels using biotechnology. The interest of the IAB is to collaborate with companies aiming to develop research projects and to solve problems related to the production of biofuels.

**Applications**

Improvement by biotechnological tools of microorganisms, algae and plants to produce biofuels and biomaterials.

**Patent application number**

**Priority date**
