

S50: THE FIRST BIOFUEL OF NEW GENERATION

Summary

The new generation first biofuel based on glycerol with similar features compared to the conventional biodiesel.

Properties: there are a lot of physical-chemical properties similar to those of FAME.

S50 compliance the current Spanish legislation as biofuel: ORDEN ITC/2877/2008, of October 9th that establishes a mechanism to stimulate the use of biofuel and other renewable bio-combustibles with a goal of transport.

Phisico-chemical properties of IUCT-S50 will be given by request

Applications

IUCTs-50 is a second generation biofuel. As such, Its used is as biofuel or as an ingredient of fuel formulation in blending with biodiesel or petrol diesel.

Patent application number

PCT/EP2007/057123

Priority date

July 11th, 2007; It entered in national phases in 19 countries, and all EU
