

Reig Jofre

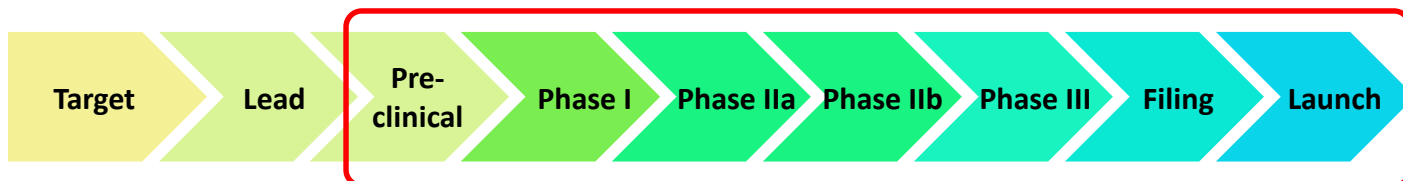

www.reigjofre.com

REIG  JOFRE

Activity

Reig Jofre is a pharma company focused on the research, development, manufacture and marketing of pharmaceutical products and nutritional supplements, as well as on contract development and manufacturing for a wide variety of active ingredients, such as biological, biotech, vaccines and small molecules.

Position in the value chain

Reig Jofre solutions

- Stabilization of complex molecules for injectable solutions and freeze dried products by means of the design of formulations and manufacturing processes under QbD.
- Analytical development and QC strategy.
- Cutting-edge production technologies.
- Pre-clinical and clinical supply from smaller needs to large clinical batches.
- Turning scientific projects into fully compliant pharmaceutical products to be marketed.

Reig Jofre strategic advantages

We offer integral tailor-made solutions, providing our expertise, flexibility and capability from early stages to launch.

Reig Jofre, committed to health

DIOMUNE SL

www.diomune.com

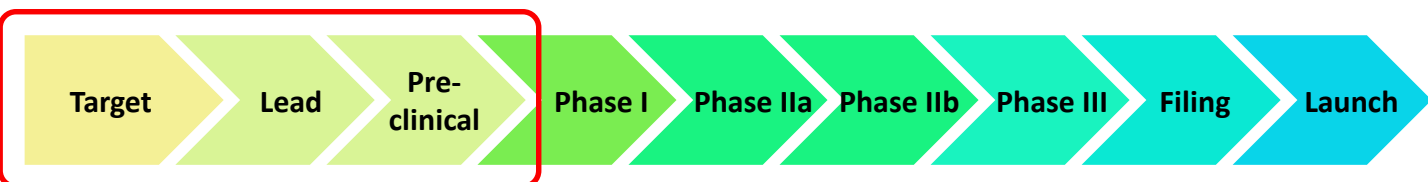

Activity

-R&D Services focused on the preclinical development of immunological, antibiotic or pharmacological treatments.

- We are experts in Immunomodulation with validated candidates to treatment of Sepsis, Stroke and Congenital Diaphragmatic Hernia (rare disease).

Position in the value chain

Mover recuadro según posición de la compañía

Diomune solutions

- Animal models of infectious, inflammatory, autoimmune and genetic diseases such as cancer, sepsis, leishmanias, ...
- Pre-clinical trials for the evaluation of safety and efficacy of novel therapeutic compounds.

Diomune strategic advantages

- More than 20 mouse knockout strains for the study of human diseases and action mechanisms of drugs.
- Evaluation of the safety and therapeutic properties of novel compounds
- Pre-clinical studies for drug discovery and validation of innovative drug targets

Animal Models for Translational Biomedical Research

Antares Consulting

<https://www.antares-consulting.com>

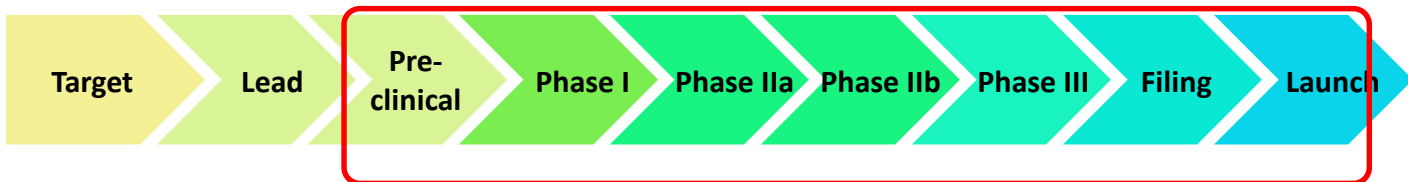

Activity

Antares Consulting is an international consultancy firm dealing with strategy, management and technology, and specialized in health, life sciences, and social and long-term care services.

We provide Fundraising, Business Development and Market Access services to Biotech and Pharmaceutical companies.

Position in the value chain

Antares Consulting - Services

Our services for Biotech/Pharmaceutical companies include the following:

- Business Plans
- Market studies
- Business Development
- Fundraising
- Market Access

Antares Consulting - Strategic advantages

- We are specialized in the healthcare sector and we have a deep knowledge of the healthcare value chain.
- We have worked with 675 different clients in 25 countries.
- Our international presence allows us to adapt quickly to different environments. We have offices in Madrid, Barcelona, Brussels, La Paz, Lausanne, Lima, Lisbon, Paris, Santiago and Sao Paulo.

International consultancy firm specialized in health

Enzymologic

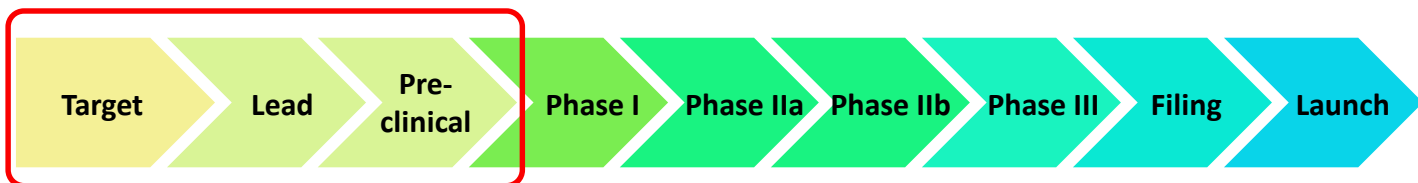

www.Enzymologic.com

Activity

Enzymologic's pioneering approach in kinetic assays enables faster and cost-effective kinetic profiling, lead optimization and parallel Structure-Activity (SAR) and Structure-Kinetic Relationship (SKR) campaigns. So, our unique methodology delivers physiologically relevant insights earlier in the drug discovery process.

Position in the value chain

Enzymologic solutions

- Binding Kinetics assays
- Kinetic selectivity assays
- Irreversible inhibition assays
- Mechanism of inhibition assays
- Custom solutions

Enzymologic strategic advantages

- Promote efficient Structure Activity (SAR) and Structure Kinetic Relationships (SKR)
- Improve decision-making
- Enhance drug's clinical efficacy
- Improve drug safety
- Drive chemical diversity and promote IP
- Help you to Identify new therapeutic uses

Identify the most promising drug candidates

KYMOS PHARMA SERVICES

www.kymos.com

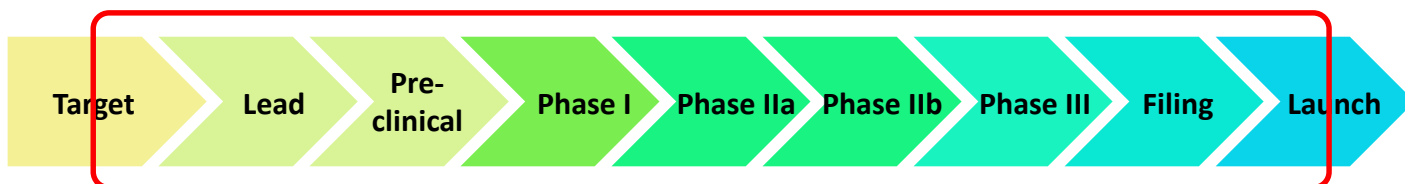

KYMOS
PHARMA SERVICES, S.L.

Activity

Kymos offers a wide range of analytical services in the field of bioanalysis and CMC (*Chemistry Manufacturing and Control*), which includes the study of both small molecules (conventional drugs) and biological drugs (proteins, therapeutic antibodies and glycosaminoglycans). These studies cover all the stages of drug development, from research in its initial phases to its commercialization.

Position in the value chain

Move box according to company position

Solutions provided by Kymos

- Development and validation of complex analytical methods
- Studies of complete characterization of proteins and antibodies
- Global management of preclinical studies and clinical bioequivalence
- Advanced Analytical Technology
- Immunological and cellular assays

Strategic Advantages of Kymos

- Comprehensive service offer
- Company certified in GLP and GMP
- Release of drugs for marketing and use in clinical trials

Your reliable partner for R+D+i

SERMES CRO

www.sermescro.com

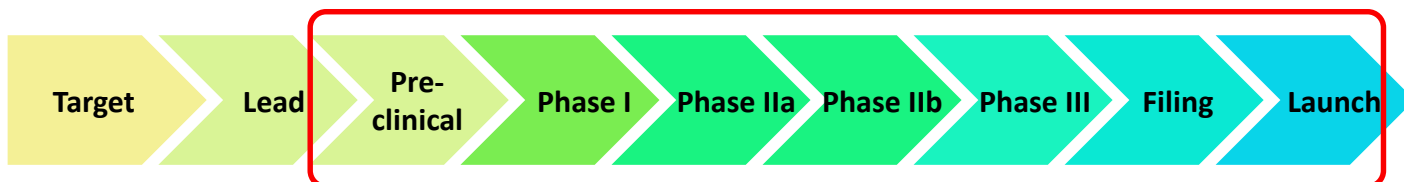

Activity

- CRO – Clinical Research Organization
- Biostatistics
- Medical Informatic
- Outsourcing
- General Administration Tasks

Position in the value chain

Mover recuadro según posición de la compañía

Sermes CRO solutions

- | | |
|---------------------------------|------------------------------|
| ✓ Clinical development planning | ✓ Clinical data management |
| ✓ Regulatory affairs | ✓ Biostatistics |
| ✓ Medical informatics | ✓ Pharmacovigilance / safety |
| ✓ Global clinical operations | ✓ Medical writing |
| ✓ Study and site coordination | ✓ Quality assurance |
| ✓ Patient recruitment services | ✓ Clinical service solutions |

Sermes CRO strategic advantages

- More than 20 year of expertise as CRO
- Highly skilled human capital
- Specific team to be aligned with each client
- Capability to support as a part of the client team
- High quality of professionals in each task
- Capability to resolve problems and give consultancy
- High knowledge of pathologies and medical databases management at start up phase

Sermes CRO - Going Beyond the Expected

Nombre compañía: VIVEbiotech

Página web: www.vivebiotech.com

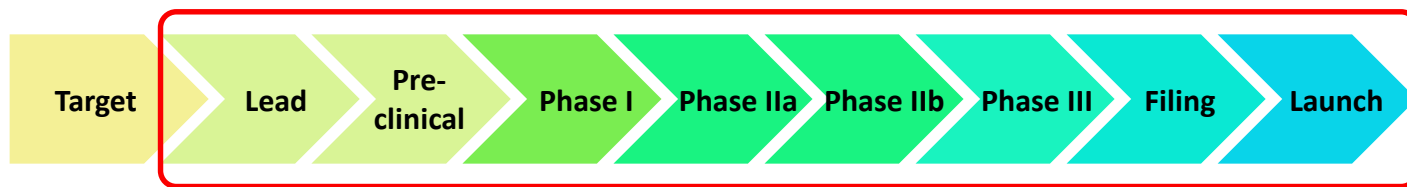

Actividad

VIVEbiotech is a biotech Company specialized in Lentiviral vectors. Specifically, VIVEbiotech is a CDMO developing and GMP manufacturing Lentiviral vectors.

Moreover, VIVEbiotech has developed an innovative technology, LENTISOMA, that is a non-integrative episomal replicative lentiviral vector that presents relevant safety advantages.

Posición en la cadena de valor

Mover recuadro según posición de la compañía

Soluciones que aporta VIVEbiotech

- Bioprocess development of Lentiviral vectors
- GMP manufacture of Lentiviral vectors
- Lentisoma (Non-integrative episomal replicative LV vector)

Ventajas estratégicas de VIVEbiotech

- Specialized in Lentiviral vectors
- Quality-based Company (Excellence seal by European Union)
- Flexibility and adaptation along customer's technical and planning requirements.

YOUR LENTIVIRUS SPEZIALICED PARTNER

Biobide

www.biobide.com

Activity

Biobide is a Contract Research Organization (CRO) with more than 12 years experience specialized in Zebrafish alternative model, offering tailor made solutions to Pharmaceutical, Biotech, Chemical, Cosmetic and Nutraceutical companies. We offer a wide pipeline of Toxicity and Efficacy services, as well as disease model generation and target validation for different therapeutics areas.

Position in the value chain

Biobide solutions

- Target validation with morpholinos (MO)
- Disease models generation
- Toxicity assays
 - ✓ Acutetox, Teratotox, Cardiotox, Hepatotox, Neurotox, Ototox, Immunotox, Ototox, Ecotox...
- Efficacy assays
 - ✓ Oncology, Central Nervous System, Metabolism, Cardiovascular, Rare Diseases, Infectious Diseases...

Biobide strategic advantages

- Wide expertise on zebrafish and specialized in this model.
- Fast and efficient assays in early Drug Discovery, decreasing cost and still been under the 3Rs (Replacement, Reduction and Refinement).
- High quality standards: working under GLP environment.
- Automated assays based on image analysis.
- Tailor made solutions.

Biobide, Your Zebrafish Partner
