

Celtarys Research opens a position for a Lab Researcher

Celtarys Research (www.celtarys.com), a newly created startup based in Santiago de Compostela (Spain), which develops and commercializes fluorescence-based innovative chemical tools to improve drug discovery, is looking for a laboratory researcher to enhance its scientific team.

She/he will work under the supervision of our Chief Scientific Officer supporting experimental procedures dealing with chemical synthesis of fluorescent compounds.

We are looking for:

- Graduate in Pharmacy, Chemistry, Biotechnology or similar
- Ideally with demonstrable knowledge and experience in organic synthesis, reaction optimization and laboratory techniques and management
- Proven research and hands on laboratory experience (academic settings or biotech companies) in some of the following areas will be acknowledged: GPCRs targets and drugs, ligand design and synthesis, combinatorial and parallel optimization, synthesis and photophysical characterization of fluorophores, chromatographic, analytical, and spectroscopic techniques and preparation of samples for biological evaluation.
- Responsible and goal-oriented professional, able to integrate into a team and work in a competitive environment, dealing with multiple projects and client deadlines.
- Fluent in English and Spanish

We offer:

- Incorporation to an innovative company
- Working within a young and committed team, with a sound scientific base.
- Fixed competitive salary according to the experience and capabilities of the candidate
- Full time position and flexible working environment

Candidates, please send CV before October 12th to info@celtarys.com
