

JOB OFFER FOR A RESEARCH SCIENTIST AT LIBERA BIO

Libera Bio® is a biopharma preclinical-stage company spun off from the laboratory of Professor María José Alonso, worldwide leader in Nanomedicine, at the University of Santiago de Compostela (USC), in Northwest Spain. Our purpose is to harness the potential of a proprietary nanotechnology platform for drug delivery (MPN Technology®) with the ambition of creating a next generation of Precision Nanomedicines to radically improve the treatment of cancer. Our lead candidate is a novel nanomedicine (MPN-Anti-KRAS), containing a new monoclonal antibody able to reach specific mutations of the oncoprotein KRAS, so far considered an *undruggable* intracellular target.

Key Duties:

- Plan and perform activities ranging from pre-formulation, formulation, characterization, analytical test and scale-up.
- Summarize data and scientific findings in presentations and reports, providing data interpretation.
- Support in drafting scientific publications and/or patents as required.
- Closely collaborate and communicate with team members.
- Perform other duties as assigned.

Candidate requirements:

Must have:

- Doctoral degree (M.D., Ph.D., or equivalent) in life sciences
- Expertise in formulation technologies with deep understanding of nanotechnology-based drug delivery platforms
- Proficient with analytical techniques (e.g. HPLC/UPLC, LC-MS, ELISA...)
- Proficient with Microsoft Office (e.g. Word, PowerPoint, Excel, Outlook)
- Excellent communication, planning and organizational skills. Ability to work on multiple tasks simultaneously, paired with the competence for trouble shooting.
- Track record of scientific excellence in terms of scientific publications, patents, and/or conference presentations.
- Ability to work independently and as part of a team, self-motivation, adaptability, and a positive attitude. Respectful and collaborative approach based on mutual trust and support.
- Fluency in English and Spanish

Desirable:

- Background in Oncology
- Experience in the delivery of biomolecules (peptides, proteins, RNA, antibodies,...)
- Experience in Pharmaceutical and/or Biotech industries

We offer:

- Full-time contract in an exciting international biotech start-up environment
- Salary package commensurate with the qualifications and experience of the candidate
- Opportunities to advance your career in a growing organization.
- Starting date: Mid-June 2023

How to apply:

- Full CV including contact details
- Motivation letter
- 2-3 contacts for references

The application must be submitted either:

- Through the specific form set up for that purpose on our website <https://www.liberabio.com/contact>, selecting "Send your CV" in the type of enquiry and including "**JOB OFFER: RESEARCH SCIENTIST**" in the message text.
- By email: rrhh@liberabio.com (Subject: "**JOB OFFER: RESEARCH SCIENTIST**")
