

## Fermentation scientist/specialist

MOA Foodtech combines biotechnology and artificial intelligence to transform waste and by-products of the agri-food industry into a "next generation protein" with high nutritional value and 100% sustainable.

If you are concerned about the environmental situation and you are ready to contribute to...

- Reduce the impact of climate change
- Stop deforestation
- Feed society in a healthy and sustainable way

Join us to make a difference for a sustainable world!

We are looking for a passionate proactive and experienced Fermentation scientist/specialist to join us for developing new alternatives for by-product valorization through fermentation.

- MSc in Chemistry, Chemistry Engineering, Biology, Biochemistry, Biotechnology or related fields with 3+ years, of active fermentation experience.
- Solid experience with microbial fermentation, including batch, fed-batch and/or continuous processes in bioreactors.
- Experience developing and executing robust fermentation processes to make a variety of biologically derived materials.
- Knowledge and experience regarding bioprocess scale-up and pilot/commercial scale processing and technology transfer to contract manufacturers will be advantageous
- Experience with a wide range of microorganisms will be highly desirable.
- Ability to work independently and in a team environment. Interact as part of an interdisciplinary team.
- Experience in SuperPro Designer or equivalent will be valuable.
- Availability to travel.

### Role and Responsibilities

As a key member of the Bioprocess team, you will be tasked with

- Plan, design and execute experiments to develop fermentation process and organize resources to meet the targets set for the project with a minimal supervision.
- Support and monitor the technology transfer of processes.
- Closely work with external collaborator.
- Keep close communication with other areas.
- Other assigned tasks as needed.

### What we offer

Competitive Salary according to the experience.

Plenty of room for personal and professional development in a fast-growing startup, building the future of food through cutting edge technologies and entering its next phase of growth

A dynamic, caring company culture and a fantastic work environment with our labs located in Pamplona, Spain. [info@moafoodtech.com](mailto:info@moafoodtech.com)
