

Project Manager

About the job.

At IOMED, we aim to lay the foundation for data-driven medicine and ensure that medical practice is based on evidence and real-world data. Our aspiration is to become catalysts for change and achieve more personalized and effective healthcare. In this way, we work tirelessly to make medical information more accessible and valuable to the community.

As a Project Manager you will lead the management of all our projects and deliveries to clients (CROs) and hospitals, which means that you must have experience and knowledge in Project Management with Agile methodology, as well as a strong technical background in IT. Experience in managing projects related to the data world will be positively valued.

IOMED's Approach.

IOMED develops AI-powered technology for healthcare data activation. It is made up of a united, young, dynamic, and flexible team, which, after several years of working together, is characterized by its agility, enjoyment of work, and rapport. Accordingly, we are looking for candidates with the desire to innovate, and grow with it, always enjoying teamwork and challenges, which are many, every day.

As an employer, we offer equal opportunity. We want to grow our team with talented, dynamic people who want to make their mark in the field of AI and research, regardless of race, color, religion, national origin, gender, physical disability, or age.

What we expect you to do.

You will have to feel comfortable giving support to the rest of the team and you can definitely expect to:

- Lead the planning, execution, and monitoring of all assigned projects, ensuring timely delivery and within budget.

- Collaborate closely with the Engineering, Product and Sales teams to understand client requirements and ensure effective communication.
- Implement and continuously improve agile project management practices to increase efficiency and quality of work.
- Proactively manage project risks and issues, identifying solutions and taking corrective actions as necessary.
- Provide regular reporting on project progress and effectively communicate with all internal and external stakeholders.
- Oversee the implementation of technological solutions, ensuring alignment with client expectations and company quality standards.
- Act as the main point of contact for clients, understanding their needs and objectives, and ensuring that deliveries are aligned with their expectations.
- Develop and maintain strong relationships with clients, serving as their advocate within the company and ensuring their ongoing satisfaction.

What we expect from you.

Hard Skills

- Demonstrated experience as a Project Manager, preferably in the technology and data sector.
- A bachelor's degree in biomedicine engineering, biotechnology, health area or a related field is a plus.
- Understanding of agile development methodologies.
- Technical background in IT, with an understanding of concepts and technologies related to data management, data products and/or

Soft Skills

- In terms of personality, we are looking for someone who enjoys working in a wide range of areas and adapts quickly to new situations.
- You have proven good communication skills, being able to talk to teams of different backgrounds.
- You have highly developed interpersonal, presentation, and communications skills (written and verbal).

- data delivery.
- Experience working in the healthcare or clinical data space is highly desirable.
- You have some knowledge of SQL, Relational DBMS, Excel or other tabulated data management systems.
- Ability to translate complex data-related incidents / non-conformities into understandable terms for various audiences.
- Comfortable using project management software tools commonly used.
- Proficiency in understanding tabular data relevant to clinical research.
- Results-oriented, problem-solving skills, and ability to make decisions under pressure.
- Demonstrated ability to lead and motivate teams to deliver high-quality projects on-time and on-budget.
- Ability to think strategically and analyze market trends and competitive landscape.

What can we offer?

- Competitive salary.
- Permanent contract.
- Company profit-sharing scheme valued at up to €15,000 per year.
- Flexible remuneration with restaurant tickets, transport tickets, nursery, training, and medical insurance.
- Flexible schedule and hybrid working model.
- 28 days of vacations per year.
- A warm, transparent and supportive team, with a huge emphasis on work-life balance.
- The opportunity to make your mark in e-health and AI.

What we do.

Our Healthcare Data Activation technology unlocks data from both structured and unstructured sources, including human-written records, thanks to our Natural Language Processing System. This data is standardized into OMOP Common Data Model, and never leaves hospitals' in-house systems, thanks to our Federated Data Model , enabling healthcare organizations to have activated and readily usable data while maintaining its protection and security.
